## Experience

- ❖ **Co-Founder/Lead Engineer | RedShift Development LLC | September 2020 - Present**
  - Led efforts to build out our custom hosting business with containerization and automation using Nomad and Docker
  - Created Wordpress updating pipelines for our Wordpress clients
- ❖ **Full Stack Engineer | Uniti Global | December 2019 - April 2020**
  - Architecting and project managing a new business system with a Golang API service and Nuxt/VueJS frontend
  - Creating automated builds and testing pipelines in Gitlab
  - Assisting with tickets in both the backend and frontend projects
- ❖ **Full Stack Engineer | Zing Studios | October 2016 - April 2019**
  - Worked with a variety of clients on various PHP projects. Site redesign implementations, custom web applications, admin panels, and legacy support
  - Assisted in architecting several projects, including a large rebuild of a business operations dashboard
  - Brought in new tools including: Vagrant, SaltStack, Docker, and Gitlab
  - Server configuration and code deployments
  - Helped establish a code review system
- ❖ **Full Stack Freelancer | Various | August 2011 - September 2016**
  - Built a golang server that serves a dashboard based on POS data and runs on RPi
  - Helped numerous clients learn basic and intermediate JavaScript skills
  - Worked on multiple Codeigniter MVC systems adding admin functions and dashboards
  - Server admin tasks and deployments for multiple clients

## Education

- ❖ **Education**
  - Self-taught with some college courses in programming and web development
  - Various online courses to help round out my knowledge, especially Udacity Full Stack Engineering and Udacity DevOps Engineering

## Interests

- ❖ Tinkering with new tech, gaming, Linux Administration, WSL, Powershell, Hypervisors, Containers, Kubernetes, AWS
